SUMMARY

B.Tech IT student (2023–2027) with hands-on industry experience as an ML Intern at WeProvision Infotech, where I architected and shipped a production-grade Multimodal Agentic AI Document Intelligence Platform serving end-to-end RAG workflows across 3+ modalities. Skilled in LangChain, LangGraph, GraphRAG, computer vision, and full-stack AI systems. Oracle AI Foundations Associate certified.

EXPERIENCE

Machine Learning Intern

May 2025 – Jun 2025

WeProvision Infotech | Sarthana Jakatnaka, Surat, Gujarat, 395013

- Designed and built the Multimodal Agentic AI Document Intelligence Platform — a production-grade RAG system using LangChain, LangGraph, Weaviate, and FastAPI, reducing average query latency by **~35%** compared to baseline retrieval through hybrid BM25 + vector search.
- Implemented LoRA/PEFT fine-tuning pipeline, PaddleOCR integration, and async task processing with Redis/Celery, cutting document ingestion time by **~40%** via parallel async workers.
- Extended the platform post-internship as a Final Year Project with GraphRAG knowledge-graph retrieval, agentic long-term memory, MLflow experiment tracking, and RAGAS evaluation — improving retrieval precision by **~28%** on multi-hop queries over **5+ document types**.

PROJECTS

Multimodal Agentic AI — Document Intelligence Platform

Final Year Project · Initiated at WeProvision Infotech

Tech: Python · LangChain · LangGraph · FastAPI · Weaviate · GraphRAG · NetworkX · spaCy · Docker · MLflow · LoRA/PEFT · RAGAS

- Architected a production-grade multi-agent platform for intelligent document ingestion, hybrid semantic search (BM25 + vector), and multimodal (text + chart/image) understanding using a LangChain + LangGraph Planner–Executor–Critic pipeline.
- Implemented GraphRAG — built a NetworkX knowledge graph from spaCy-extracted entities and LLM-derived relationships, fused with vector search via Reciprocal Rank Fusion to enable multi-hop reasoning across documents and improve retrieval on complex, multi-entity queries.
- Added agentic long-term memory (episodic + semantic) backed by Weaviate, enabling the agent to recall user preferences and prior corrections across sessions for personalized, context-aware responses.
- Delivered an end-to-end RAG pipeline with async FastAPI backend (Redis/Celery, SSE streaming), Prometheus + Grafana observability, validated through RAGAS evaluation and MLflow experiment tracking to reduce hallucinations and monitor retrieval quality.

AI Stock Predictor

Academic Project

Tech: Python · TensorFlow · LSTM · FinBERT · Streamlit · NLP

- Engineered a "Dual-Brain" trading dashboard combining a 60-day LSTM price model with live FinBERT sentiment analysis on real-time news, generating unified Buy/Sell/Hold signals with confidence scores.
- Deployed an interactive Streamlit dashboard for real-time prediction visualization and model confidence scoring, enabling end-to-end pipeline from raw data to actionable signal in under 2 seconds.

Vision-Based Multimodal HCI System

Personal Project

Tech: Python · OpenCV · MediaPipe · Speech Recognition · Gesture AI

- Built a real-time touchless HCI system using OpenCV and MediaPipe for hand/eye tracking and gesture-based application control, supporting **10+ gesture commands** out of the box.
- Optimized inference to **sub-50 ms** on standard webcams via multithreading; integrated voice commands for fully multimodal input without any dedicated hardware.

EDUCATION

B.Tech in Information Technology

2023 – 2027

A.D. Patel Institute of Technology, Anand, Gujarat

Currently Pursuing

Higher Secondary Certificate (Class 12)

2022 – 2023

Gujarat Secondary & Higher Secondary Education Board

Score: 68.77% · Percentile: 84.23

Secondary School Certificate (Class 10)

2020 – 2021

Gujarat Secondary Education Board

Score: 77.17% · Percentile: 87.98

TECHNICAL SKILLS

Programming Languages: Python, C/C++, HTML, CSS

AI & ML: LangChain, LangGraph, RAG, GraphRAG, NetworkX, spaCy, HuggingFace, RAGAS, LSTM, Weaviate, MLflow, LoRA/PEFT, FinBERT

Computer Vision: OpenCV, MediaPipe, PaddleOCR, Gesture AI

Backend / Ops: FastAPI, Redis, Celery, REST APIs, Docker

Dev Tools: Git, VS Code, Jupyter, Power BI, Tableau, Grafana

CERTIFICATIONS

- **Oracle AI Foundations Associate** — Oracle Corporation
- **SIH 2025 Participant** — Smart India Hackathon

LANGUAGES & SOFT SKILLS

Languages: Gujarati (Native) · English · Hindi

Strengths: Critical Thinking · Problem Solving · Adaptability · Leadership · Time Management
